# meteor

Colori metallici e ferrosi, sfumature che vanno dal ruggine al bronzo fino al bianco gesso antichizzato: è l'espressione pittorica e materica dello smalto quello che maggiormente caratterizza Meteor. Una collezione ideale per pavimentazioni contemporanee, connotate da un solido taglio minimale: dalla zona giorno alla zona notte, passando dalla cucina al bagno senza interruzione. Il gioco modulare dei tre formati unito alla presenza dell'ottagono su rete rende Meteor una serie essenziale ma estremamente versatile ed espressiva, capace di portare ottimi risultati estetici e di resistenza. Anche a rivestimento gli stessi effetti pittorici sono di grande forza, e completano il progetto ceramico in architettura. Con l'introduzione del listello diamante su rete e dell'elemento raccordo, Meteor è una collezione importante sia dal punto di vista estetico e decorativo che tecnico strutturale.

Ferrous color shades ranging from rust, bronze, chalk, and ancient whites. This is the pictorial essence of the glazes that mostly characterize the METEOR collection. METEOR is the ideal collection of contemporary flooring with a solid minimal profile that provides continuity with no interruptions from the night area to the day area of the home and extends into the bathroom and the kitchen. The modularity of the three sizes in conjunction with the octagon on a mesh makes METEOR an essential choice that offers an extremely versatile and expressive style aimed at obtaining excellent results in terms of aesthetics and resistance. As a wall covering solution, METEOR offers a particularly strong, yet warm and mild pictorial sensation, while at the same time producing a complete architectural ceramic project. By including the diamond listel on a mesh, METEOR represents a most complete collection which highlights its esthetical and decorative elements as well as its technical aspects.
